Section A

In total, 31 studies were submitted to the thematic competition.

Offering the theme of the 20th UAPA competition, I first of all waited for unexpected and fresh sacrifices of pieces in the corner. But many participants took the simplest path: they donated rooks with the check, «screwed» a thematic introduction to a completely different idea, or showed very obvious sacrifices who instantly ended the game.

The following studies were not included in the award from my pre-selection:

Nº2. (d5-c2). Unsuccessful entry. **Nº4. (a5-b2)** Obvious sacrifice. - **Nº7. (g1-e2).** Unsuccessful entry. -**Nº14. (d8-a8).** Known sacrifice from the study of A. Wotawa (Deutsche Schachzeitung, 1941), followed by b5-b6, is «screwed» to further play to position of 6-piece mutual zugzwang. - **Nº15. (d2-b8).** Obvious sacrifice. -**Nº20. (e2-g8).** The final thematic combination is known from E. Pepelyaeva (Alma-Atinskaja Pravda, 1959).- **Nº25. (d4-g6).** Obvious sacrifice. -**Nº27. (g8-g4).** Obvious sacrifice. In addition, the play is known from the wrong study of S. Belokon (Stella Polaris, 1971).

The following 11 studies are awarded:

№12. Jan Sprenger (Germany)

1.g4+ The only move that does not lose on the spot. [1.Ra5+? Kf6 2.Rxg2 Qxf7+ 3.Kh4 Qb7 4.Rg1 Qb4+—; 1.Rxg2?? g6+ 2.Kh4 Qh6#] **1...Kf4 2.g5!** [The ending after 2.Rxg2? (9...Qxg2? 10.Rh2=)] 9...Kf1** Now Qe4+ looks lethal, but White still has a shot: **10.Rh1+!** [thematic move] The first rook sacrifice draws the queen to h1... **10...Qxh1 11.Rg2!!** ...and the second closes the door behind her! **11...Ke1 12.Rg1+! Qxg1** [stalemate] Both Black and White sacrifice a piece in the corner. The Rg2 tactic and the final position is based on Sprenger & Minski, Neidze MT 2021: <https://eg.org.ua/chessgame/minskimsprengerj-0270-45g4e2/>

The most interesting study in the thematic plan. On the same h1 square, both black and white sacrifice a piece. The fact that stalemate is known from another study of the author (together with M. Minski), little influenced the judicial assessment — it's not at all in the final position.

№13. Serhiy Didukh (Ukraine)

An excellent miniature, perhaps with the most unexpected sacrifice of the piece in the corner.

№17. Harold van der Heijden (Netherlands)

Two excelsiors after the knight's thematic sacrifice on the first move.

The most daring study of the competition! White must clearly define the order of his sacrifices in three corners of the board.

Problem theme with two mutual sacrifices per corner. But in the final part of the study there is, albeit accurate, finishing off the Black without any chance for the latter.

An excellent study in which one of the White knights plays the main role. White has to get rid of his a- and d-pawn to prepare for the final liquidation into a pawn ending. Timing is very important; White has to be exact in the execution of his plan.

Humor in chess! White forces a combination like you will normally see in a game of draughts. The highlight of the study is 3.Rb6! Just like in the 1st prize study White liquidates into a winning pawn ending.

UAPA award:

General remarks.

The level of the tournament was in my opinion good and equal. Therefore I propose all honorable mentions ex. aquo as well as all commendations ex. aequo.

Some composers don't explain why a particular move is the best. For example in one study the author gives double exclamation marks in few moves (what suggest that those moves are unexpected) and does not reveal other possibilities (what suggest that the move is only sensible). This is a contradiction.

An interesting study with numerous pins and unpins of white and black and with an additional motif of a pin stalemate. The study can be called "*Dithyramb in honor of the pinning*"

A sympathetic promotion in the knight. The author overuses exclamation points, giving them at imposing moves which is counterproductive.

Sympathetic play, but reciprocal zugzwang in pawn studies (or general pawn endings) is not specially original (it has name "opposition")
